

Supervised Water play policy

Aim

To minimise the spread of germs through contaminated water and to make sure children are safe when playing with the water.

Methods

Staff to supervise their play at all times. To make sure they are wearing aprons and if possible wellie boots to protect their clothes and their feet.

Children can wear disposable gloves if they have open wounds, rashes or broken skin conditions on their hands or arms so they can play in the water.

Outdoor areas are checked daily for pooled area where rain has fallen to prevent children drowning. If these can be made inaccessible to the children they then can go out in the other part of the outdoor area.
